I received a message today from Kwang-jin stating that he is now under investigation at the port of Sumas.

The situation seems very rough. In case that he cannot pass the examination, you should try to get a chance for him to be re-examined. Do not let him be sent back to China. If there is no lawyer at John Day to take up this matter, you will have to come here to arrange a lawyer for him. Don't look at this event as unimportant.
